At Cannondale, we know our riders demand the highest levels of performance, quality, and safety, and we hold ourselves and Cannondale products to that standard.

We have identified a safety issue with the Cannondale Model Year 2021-23 Dave bicycles and framesets. The bicycle headtube/downtube weld can become damaged and separate from the bicycle frame, posing fall and injury hazards. As such, we are conducting a product recall of these bicycles in cooperation with the U.S. Consumer Product Safety Commission.
